

Digital Probe Thermometer

Model: Pocket Temp

Digital probe thermometer

This probe type thermometer has many features. Displays temperature to 0.1 degrees C - as required by most HACCP (food safety) systems, pocket style, easy to use, safety cover over the probe - also attaches to the top of the unit to extend the handle, very wide temperature range and low cost *"easily our most popular unit"*.

By keeping the cost down and the features high, this probe puts food safety within reach of everyone.. Café, Restaurant, Take away, Service station, Delivery drivers, etc.

The **WATERPROOF** design ensures that these units last the distance around food handlers.

Great for use anywhere temperatures need to be taken eg: medical, food, in processing at receipt & dispatch and also food display, supermarkets, plumbing, etc.
