

Grill Max Toaster

The Roband Grill Max toaster series is a statement of minimalist design with great functionality.

It's timeless look belies a machine that is simple to use, functional, reliable and economical.

Used for a variety of food preparation, from grilled food to open melts and toasted sandwiches these machines are well designed to maximise speed whilst operating efficiently.

For energy efficient operation, set the energy regulator to a low setting to keep elements warm. When the timer dial is turned on, full power is delivered to elements for toasting during the timed period, overriding the low setting and with a quick heat up time. The Grill Max toaster then reverts back to the low temperature to keep food warm until ready to be removed and served.

Featuring either stainless steel elements for prolonged element life and good heat retention or glass elements for rapid heat up time. Both types of machine deliver outstanding results and the two options exist to suit customers' preferences.
